Clutches: Discs, plates & springs

Vparts discs, plates and springs have been made from the finest materials available. Through research and development, we are constantly striving to offer the best possible friction material for your motorcycle or ATV. Vparts tempered steel drive plates go through a vibratory deburring process and then are quality checked for flatness to provide optimum performance. Heavy duty Vparts clutch springs are pre-set, shot-peened, and heat treated for performance and durability.

BANDO

BANDO Chemical Industries, Ltd., Multinational founded in 1906, is one of the most recognized belt manufacturer in the world. Particularly, on 2 wheels sector, Bando is an important supplier for renowned make such as: Kymco and Honda. Their excellent performance comes from the quality of the materials employed, manufacturing processes and innovative technology.

- Coating: Polyurethane and aramid fibre employed result in a high overheating resistance and abrasion against corrosive liquids such as: engine oil, fuel and other greases. Side cutting is extremely accurate to avoid belt deformation and elongation.

- Thread tensor: Bando employs in exclusive their thread called "Tetron" which is interlaced with rubber in the belt resulting in a high resistance against dilatation. Therefore, it distributes uniformly the stress along the entire belt.

- Tooth: The tooth profile has been reinforced with aramida to avoid overheating and deformation caused by high velocity and towing changes.

- Internal structure: It is made of polyurethane. Accurately injected to each belt model to achieve a properly composite distribution along the belt.

Line available: Classical / Reinforced with Kevlar / Double Tooth.

MITSUBOSHI®

MITSUBOSHI Belting, Ltd., "Belts that transmit power" This is the origin of Mitsubishi belts. A large Japanese belts manufacturer since 1919.

Japanese industrial development is known all over the world and this company has closely contributed to this fact. Classic, reinforced or double tooth are on top quality level. Because of their reliability and quality, manufactures such as: Yamaha, Suzuki and Piaggio have chosen Mitsubishi as their main belt supplier.

Classic and double tooth belts are made of thread, rubber and reinforced with Kevlar. Fibre is mixed with rubber, through the length of the belt to contribute to the correct power transmission. Therefore, increases overheat resistance and abrasion.

As a result of a perfect contact surface and an exceptional grip, Mitsubishi belts guarantee the best power transmission efficiency that lead to a quick throttle response and silence.

Product

-Tooth: Decreases stress caused by towing bending and hot.

-Side cutting: Extremely accurate, allows and excellent fitting between belt and pulley.

-Braiding: Particularly resistant to possible loads on certain parts on the belt.

-Reinforced: Belt inside and outside braiding results in higher vehicle towing stability.

DAYCO®

DAYCO Europe Srl, is synonym of power, durability and reliability. The company is committed with customers to provide the market with a wide belt range, continuously updated and with a high or equal quality to suit the transmission quality requirements. Dayco is the world leading company offering to motorcycle makers and the after market reliability product solutions for the best performance. Service and assistance offered are also valuable terms for professionals.

Product

Belts are developed with the latest technology and efficient compounds to increase their resistance to compressive stress, heat, and flank wear that guarantee a high efficiency and long life time. They are flexible belts with teeth moulded onto its inner surface and in some cases both inner and outer surface often used to transfer motion to transmissions. As toothed belts can also deliver power on small sprockets allowing to take the most traction and relation advantage. Apart from the classic product line, there is the "Power Plus" line intended to these vehicles with high efficiency and requirements, such as: Quads, ATVs, snowmobiles, cars, golf carts and utility vehicles. Power Plus belts are made of aramid fibre (85% Kevlar and Twaron polyamide compound)

V Lithium

LITHIUM BATTERIES. MAXIMUM PERFORMANCE

NEW LITHIUM BATTERIES. VLITHIUM BATTERIES

Lithium emerged in our society a long time ago thanks to the mobile devices we daily use. Later, we started using this element on electrical bicycles and other light means of transport. Today, this technology has finally been adapted to motorcycles. This year, several manufacturers have introduced lithium batteries on their original new models. This is why we have the pleasure to introduce you our new range of lithium batteries, branded V-LITHIUM. We offer 19 models of lithium batteries corresponding to 70 standard models.

Regarding characteristics and technical information, the data and results that V Lithium batteries offer are absolutely astonishing compared to the lead-acid technology.

Discover below 12 reasons why the V-Lithium technology is better than others:

Ultralight: Lithium batteries are 4 times lighter than lead-acid batteries.

High efficiency and performance: They have almost double amperage of lead-acid batteries.

Installation: Extremely fast and easy to install. Buy it, install it and start it!

Position: Lithium batteries can be installed in all positions, even upside down, since they do not contain electrolytes. Highly recommended for those sport motorcycles, whose battery stays on a leaning position.

Packaging: A totally innovative blister packaging with hanger hole will help you to show the batteries to your customers in your shop.

Useful life: twice superior to standard batteries.

Ultrafast charge time: twice faster than standard batteries.

Maximum safety, since they do not include acid anymore.

100% ecological: 0 pollution.

LED charge status indicator light: This useful LED light indicates in real time and at any moment the charge status of the battery by simply pushing an integrated button in the device. Therefore, V-Lithium batteries include their own tester!

Waterproof models: 7 of our Lithium batteries are also 100% waterproof, totally resistant to water, so drivers can enjoy their quads or motorcycles to the limit, through hard muddy ways and puddles.

High stock rotation: Any retailer or wholesaler can cover 70 standard models with only 19 different Lithium batteries. No more needs to stock uncountable models of batteries anymore. Lithium batteries allow you to speed up and improve your inventory organization.

Enjoy the last battery technology for motorcycles and do not stay behind!

As case study, we compare the YTZ14S standard battery, used for high cylinder motorcycles, with its Lithium equivalent LITZ14S. Look at these differences...

VLITHIUM	CONVENTIONAL
LITZ14S (REF.34365)	YTZ14S (REF.14440)
[V Lithium Battery]	[Activated lead-acid battery, without maintenance]
Weight: 1.1 Kg	Weight: 4,25 Kg

Furthermore, LITZ14S is not only the equivalent of model YTZ14S but also of YTZ12S; which means, 2 batteries in 1!

- ✓ **ULTRALIGHT**
3 times lighter than lead-acid batteries
- ✓ **EXCELLENT LIFE CYCLE**
More than 2000 cycles under JIS standard (compared to lead-acid batteries of 150-300 cycles)
- ✓ **FAST CHARGE**
90% charged in only 6 minutes
- ✓ **LONGER SHELF LIFE**
Shelf life of more than one year (lead-acid batteries: 6 months)
- ✓ **HIGHLY SAFE**
Lithium iron phosphate contained and specific installation processes insure safe performing.
- ✓ **ENERGY EFFICIENCY**
The high and stable voltage improves spark plug action resulting in efficient gas consumption.
- ✓ **NO SPILLS**
May be installed in all positions since they do not contain electrolytes
- ✓ **NO POLLUTION**
Do not contain any acid nor heavy metals as lead, cadmium, hydrargyrum (mercury)

Shining a light on OEM quality

"Total Quality Management" (TQM) is the corporate principle on which OSRAM defines its quality standards.

It covers the demands that we place on the finished products, components and parts, as well as on the requirements for optimizing our processes and organization. Compliance with this principle is confirmed by the fact that our quality management system has been certified to ISO 9001 and our environmental management system to ISO 14001.

OSRAM manufactures for OSRAM.

One of our principles is to develop as many of our own production facilities as possible. We manufacture major prematerials, develop our own production processes and construct complex, computer-controlled production plants. Development and manufacture of all products at OSRAM is certified to DIN EN ISO 9001.

The "Automotive Lighting" division and all the lamp manufacturing plants producing for this division are certified to TS 16949 (special quality management requirements for automotive suppliers).

Our aim is to get better and better.

To keep our strategies and activities in perfect tune with the needs of our customers, we are in close contact with all our lobby groups. What's more, we conduct extensive and targeted opinion polls among our customers in 29 different countries each year. In this way, we are able to improve the quality of our products and services and defend our number one position in the face of tough international competition. Our vehicle lamps from OSRAM are renowned for their outstanding precision, reliable operation and impressive durability. They put the ideal amount of light on the road without blinding oncoming drivers 1) and therefore contribute greatly to road safety.

All the lamps comply with the quality requirements of car manufacturers and therefore surpass the requirements of European standards. You can always rely on OSRAM lamps.

PRODUCT RANGE

We put at your disposal the widest range of OEM type levers under our brand, Vparts. More than 600 different models of levers for most of the motorcycles in the market, scooters, and quads/ATV. Our range includes front/back brake levers and clutch levers, available on black and silver colours. Furthermore our Off Road range offers different

finishes as the requested forged levers (which prevent breaking in the event of a fall by folding themselves and come back easily to their original form) and different length adapted to the type of use and pilot requirements.

Lever protectors

REF.43118

For Universal Pro guard. These pro guards adapters are suitable for any handlebar with inner diameter 13-23mm

Racing levers

A comprehensive test carried out has shown that when riding motorcycles at high-speed the friction force exerted by the air on levers reduces moto performance capacity.

Effective laboratory studies and controls have managed to create a new lever model. Especially efficient at high speed. These new levers have been designed with the latest technology taking particular account of the MAKEet needs and based on top level competition.

Colour: Full Black (red regulator)

Sold individually

Pack: Blister

ARTICULATED

As far as the construction of the lever is concerned, if a fall occurs, the arm lever will fold to avoid getting break and a possible injury on hand.

CNC MECHANIZED

The manufacture of the lever is highly mechanized, employing a numeric control nothing is left to chance. As a result, through the most advanced processes and treatments the lever gets its final aerodynamic and strong form.

ANODISED ALUMINIUM

Aluminum is an ideal material for this kind of parts, it provides an ultra-light weight for the best performance. If we anodized aluminum with an electrochemical process that converts the metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish results in the perfect lever for motorbikes.

ADJUSTABLE

6 quick adjust levels enhance vehicle performance and functionality ensuring the reliability and maximum durability of the engine. Besides, your braking will be always accurate and in perfect harmony with the gear box.

FAIRING BRACKETS

NEW

**MOTO
BRACKETS**

Motobrackets are a direct replacement for the most demanded OE fairing brackets. They match OE fairing brackets in fit, form and function. Motobrackets are built to the same exacting specification as the OE engineers saw appropriate for bikes. We offer 55 different models with direct applications for 70 bikes, including R, Naked and Touring from Honda, Kawasaki, Suzuki and Yamaha. Why pay for an expensive racing bracket when you can replace it with a high quality bracket, now available at Vicma?
